

Taw Mill

Location: 8 nm SSW of Eggesford, 1 nm S of North Tawton cheese factory, 5 nm NE of Okehampton

N50° 46.26' W003° 54.03 - 400 ft amsl

PPR from airfield owner Fred Baulch 01837-82502
Briefing also available from Richard Horner 07770-325124

Approach from North view

View from 17 threshold

Runways	Grass 17/35, 500 x10m – N.B. the northern threshold will suffer with soft ground during the winter months.
Windssocks	East of strip, near hedge cut-out
Circuits	17 LH, 35 RH
Facilities	None - Nearest fuel at Eggesford
Accommodation	Make own arrangements

n.b : There is a 100 ft upslope from the threshold of r/w 17. It is common practice to land uphill with a tail-wind but this depends on aircraft type & pilot experience. If not sure, make a low level pass to assess conditions. Site is tree-lined so be aware of possible curl-over. Two tracks cross the runway but it is possible to include these in the landing run. Beware telephone poles & cables in next field if taking off uphill to South. This is a very useable strip but always with caution. Airfield closed October - March due to water-logging.
